

Project Charter

Title	SmartLogi - AI-Powered Intelligent Logistics Management System
Start Date	April 01, 2026
End Date	October 31, 2026
Project Manager	Nguyen Van A
Overview	Development of a comprehensive logistics platform integrating AI to optimize delivery routes and provide real-time order tracking across Web and Mobile interfaces.
Scope	- Development of a Web Admin Dashboard for dispatchers. - Development of a Mobile Application for drivers (iOS/Android). - Integration of an AI Route Optimization Module. - Implementation of reporting, analytics, and warehouse management features.
Budget and Resources	Budget: 500,000,000 VND. Human Resources: 1 PM, 1 BA, 2 Developers, 1 Tester. Infrastructure: AWS Cloud Services, Google Maps Platform API.
Stakeholders	- Board of Directors (Sponsors). - Operations Team (End-users). - Project Development Team (Dev/Test/BA). - Third-party Logistics Partners.
Success Criteria	20% reduction in average delivery distance/time. - System uptime maintained at 99.9%. 100% driver adoption rate within the first week of rollout.
Methodology	Agile / Scrum (2-week Sprints with daily stand-ups).
Approvals	Approved by: Project Steering Committee (April 02, 2026).
